Revision History

Version	Date	Author	Summary of change
1.0	25 Nov 2024	J.W. van Antwerp	Policy 986 AED created following the data-security incident commencing 25 November 2024.
2025.06.24.1	24 Jun 2025	J.W. van Antwerp	Metadata segment, AD-URIEL identifiers, geo-lock and SSH fingerprint added; Project ID AED9003135105086 assigned.
7.2.5	04 Jul 2025	J.W. van Antwerp	UIDv7 record, PGP public key and NFT / NFT-PLANT provisions added.
7.3.1	05 Jul 2025	J.W. van Antwerp	Official release (Ref. AEDPOL986M0149, OV7). Relations, fines, timelines and licensing notes consolidated.
8.0	2026-10-06	J.W. van Antwerp / Ionity Global	Migrated to TEMPLATE_2026_OFFICAL_v1.1. Restructured into formal clauses; definitions, liquidated-damages schedule, notice and cure procedure, governing-law and dispute-resolution provisions added. Issuing parties updated to Ionity Global (Pty) Ltd and Ionity (Pty) Ltd jointly with Antwerp Designs. Commercial values unchanged.

Notice to the Reader

This document is a legal instrument. It records the rights of the Rights-Holder and the terms on which Protected Material may be accessed or used. By accessing, receiving, storing or using any Protected Material you accept these terms. If you do not accept them, do not access, receive, store or use Protected Material, and contact the Rights-Holder through the channels in clause 14 to arrange return or verified deletion.

The commercial terms in this version (rates, timelines and escalation) are unchanged from Version 7.3.1. This version restructures the Policy into formal clauses, adds definitions, a notice-and-cure procedure, a liquidated-damages schedule, governing-law and dispute-resolution provisions, and migrates the document to the Ionity Global 2026 official template.

1. Executive Summary

Policy 986 AED (the "Policy") is the active master policy of the Ionity ecosystem. It records the ownership of, and the conditions attached to, all intellectual property, metadata, designs, source code, digital assets (including NFTs and the NFT-PLANT series), data and communications originating from Antwerp Designs, Ionity (Pty) Ltd, Ionity Global (Pty) Ltd and their founder, Johan Wilhelm van Antwerp, from 2018 onward.

The Policy was first adopted on 25 November 2024 in direct response to a sustained, multi-platform data-theft and identity-compromise campaign against the author. It has since been maintained as a living instrument. Version 8.0 migrates the Policy onto the official Ionity Global 2026 document template and restructures its content into formal, enforceable clauses, without altering any of the commercial terms adopted in Version 7.3.1.

In summary, this Policy (a) reserves all rights in Protected Material to the Rights-Holder; (b) requires a valid, written licence for any commercial or external use; (c) prohibits unauthorised access, copying, disclosure, ingestion into artificial-intelligence systems, or exploitation of Protected Material; (d) sets out a notice-and-cure procedure (seven-day Timeline followed by a three-day Payment Period); (e) fixes a liquidated-damages schedule of USD 1.00 per kilobyte of Compromised content, per System Segment, escalating by 10% per fifteen days while unpaid; and (f) subjects all disputes to the law of the Republic of South Africa.

The Policy applies globally, does not lapse on hand-over or agreement, and binds any person or system that holds, has held, or could hold Protected Material without authorisation. Compliance, early contact and cooperation are expressly rewarded by reduction or waiver of liquidated damages (clause 9.10).

Key Parameters at a Glance

Parameter	Value	Clause
Rights-Holder	Ionity Global (Pty) Ltd; Ionity (Pty) Ltd (formerly Antwerp Designs); Antwerp Designs and relations; Johan Wilhelm van Antwerp – jointly and severally	2.1
Scope	All Protected Material from 2018 onward; global; perpetual; AI / LLM systems expressly included	4
Licence	Written, rooted Licence required for any gain; Licence AED 900 for hardware and software; Creative Commons only where expressly stated	5.3, 6
Timeline	7 days from Contact Date (no longer than one week)	9.2
Payment Period	3 days after the end of the Timeline	9.4
Auto-Default	No reply or no arrangement within 7 days converts First Contact into a claim	9.5
Liquidated damages	USD 1.00 per kilobyte of Compromised content, per System Segment, Affiliates jointly and severally liable	10.2–10.4
Escalation	+10% of outstanding amount per 15 days (or part) unpaid, no upper limit; plus interest and costs	10.5, 10.7
Grace period	None. General grace period 15 Dec 2024 – 15 Apr 2025 has ended; one discretionary 7-day extension only	9.6
Compliance incentive	Prompt contact, disclosure and verified deletion may reduce or clear liquidated damages	9.10
Governing law / forum	Law of the Republic of South Africa; High Court, Gauteng Division, Pretoria (or any competent court at the Rights-Holder's election)	12

2. Parties, Status and Authority

2.1 The Rights-Holder

- 2.1.1** This Policy is issued jointly and severally by: (a) Ionity Global (Pty) Ltd; (b) Ionity (Pty) Ltd (formerly Antwerp Designs); (c) Antwerp Designs, including its trading and successor names Antwerp Designs Ionity, Antwerp Ecosystems Designs Ionity (AEDI · ÆDī), van Antwerp Engineering, Antwerp Engineering Designs, van Antwerp Designs, Project Alpha (Alion) and ORCHID; and (d) Johan Wilhelm van Antwerp in his personal capacity as author, founder and creator of the foregoing (together, the "Rights-Holder").
- 2.1.2** Each entity listed in clause 2.1.1 is entitled, alone or together with any other, to enforce this Policy in respect of any Protected Material, irrespective of which entity created, held or published that material at the time of the Compromise. A reference to "Antwerp Designs" in any earlier version, licence, NFT, metadata record or communication is a reference to the Rights-Holder as defined here.
- 2.1.3** The Rights-Holder is the "Affected Party" for the purposes of this Policy whenever Protected Material is Compromised.

2.2 Status of this Policy

- 2.2.1** This Policy is a standing declaration of rights and a set of terms on which the Rights-Holder makes Protected Material available, if at all. It operates (a) as a notice of rights to the world at large; (b) as binding contractual terms for every Member, Licensee and person who accesses, uses or retains Protected Material; and (c) as the Rights-Holder's published pre-estimate of loss for the purposes of any claim arising from a Compromise.
- 2.2.2** This Policy supplements, and does not limit, any right the Rights-Holder has under statute, common law or international convention, including the Copyright Act 98 of 1978, the Trade Marks Act 194 of 1993, the Electronic Communications and Transactions Act 25 of 2002, the Protection of Personal Information Act 4 of 2013, the Cybercrimes Act 19 of 2020, the Berne Convention and the TRIPS Agreement.

2.3 Authority and Signatory

- 2.3.1** This Policy is authorised and signed by Johan Wilhelm van Antwerp, Founder, Technical Lead and Architect of the Rights-Holder, whose authority to bind each issuing entity is confirmed by the authentication record in clause 15 and Annex B.

2.4 Supersession and Continuity

- 2.4.1** Version 8.0 supersedes Version 7.3.1 (Ref. AEDPOL986M0149, released 05 July 2025, SAST 21:09) and all prior versions from 25 November 2024. Rights accrued, notices issued, fines levied and Auto-Defaults triggered under any earlier version remain valid and are carried forward under this version without interruption.
- 2.4.2** Where any earlier version is more favourable to the Rights-Holder in respect of a Compromise that occurred before the Effective Date, the Rights-Holder may elect to rely on that earlier version.

3. Definitions and Interpretation

3.1 Definitions

In this Policy, unless the context clearly indicates otherwise, the following capitalised terms have the meanings assigned to them below. Terms defined in the body of the Policy have the meaning given there.

Term	Meaning
AEDstamp	The Rights-Holder's digital identity and authorisation mark (reference AED986_DLICD_1-A) issued through the Orchid register and required for any enterprise or non-private use of Protected Material.
Affected Party	The Rights-Holder, and any Member or Licensee whose data is protected under this Policy, in respect of Protected Material that has been Compromised.
Affecting Party	Any person, entity, system, platform, service or automated agent (including any artificial-intelligence or large-language-model system and the persons controlling it) that caused, contributed to, holds, hosts, transmits, processes or benefits from a Compromise, including any party that has gained knowledge, revenue, income, profit or any other advantage from Protected Material without a valid Licence; and includes its Affiliates.
Affiliates	All main branches, sub-branches, subsidiaries, holding entities, partners, contractors, hosts, mirrors and connected systems of an Affecting Party in or through which Protected Material was found, is found, is known to be, or could reasonably be located.
Auto-Default	The automatic conversion of a First Contact into a liquidated-damages claim where no reply is received, or no arrangement is concluded, within the Timeline (clause 9.5).
Business Day	Any day other than a Saturday, Sunday or public holiday in the Republic of South Africa.
Compromise / Compromised	Any exposure of Protected Material, for any duration (including a single millisecond), to read, copy, transfer, index, cache, render, ingest or network transmission by or to any person or system not holding a valid Licence or written consent, whether or not the exposure was intentional and whether or not it caused further loss.
Creative Commons	The Creative Commons Attribution-NonCommercial-ShareAlike 4.0 International licence (CC BY-NC-SA 4.0), or any other Creative Commons licence, applying only where expressly stated on a specific work and always subject to this Policy (clause 5.3).
Current Value	The liquidated-damages rate of one United States dollar (USD 1.00) per kilobyte of the total size of Compromised content, fixed by reference to the gold-to-dollar value on 5 July 2025, as elected by the Affected Party (clause 10.2).
Data	All digital property, private data, disclosed data, personal information, credentials, metadata, logs, communications and records of the Affected Party, in any format and on any medium.
Effective Date	06 October 2026.
First Contact	The first attempt, by any means (telephone, voice call, e-mail, messaging, platform channel, physical post or in person), by the Affected Party to make contact with an Affecting Party regarding a Compromise, fine, note or enquiry. The date on which the attempt is made is the Contact Date, whether or not a reply is received.
Licence	A valid, written, rooted licence issued directly by the Rights-Holder (including Licence AED 900 for hardware and software) or by the holder of a currently active Licence with express sub-licensing rights, and bearing an AEDstamp where required.
Member	A person or entity admitted to the Orchid, with or without financial contribution, who has accepted this Policy.
NFT / NFT-PLANT	Any non-fungible token, tokenised asset or associated metadata created, minted, signed or sold by or on behalf of the Rights-Holder, including the NFT-PLANT series and the universal branding assets described in Annex B.

Term	Meaning
Official Notice	Contact made, or proof of contact attempted, by the Affected Party in digital or physical form within the Timeline, stating the Compromise and the amount or basis of liquidated damages claimed (clause 9.2).
Orchid	The internal register maintained by the Rights-Holder of persons and entities that have joined Antwerp Ecosystems Designs Ionity and its relations under this Policy, used to verify Members, issue AEDstamps and record consents. The Orchid has no relation to the ORCID researcher-identifier service.
Payment Period	The period of three (3) days immediately following the end of the Timeline within which all amounts stated in the Official Notice must be paid in full (clause 9.4).
Protected Material	All works, designs, drawings, concepts, CAD layouts, schematics, source code, firmware, documentation, products, prototypes, brand assets, metadata, identifiers (including AD-URIEL and UUID records), NFTs, digital assets, images, archives (including .rar and any other container format), Data and communications created by, originating from or belonging to the Rights-Holder from 2018 onward, whether released or unreleased, and including this Policy, its layout and the per-kilobyte valuation method.
Special Permission	A written, AEDstamped variation of this Policy granted by Johan Wilhelm van Antwerp or by the holder of a currently active Licence with authority to grant it (clause 6.4).
System Segment	Each distinct drive, volume, device, network, cloud tenancy, data centre, repository, platform, channel or storage location (fixed or removable, front-end or back-end) in or through which Protected Material passed or is held. Each System Segment is counted separately for liquidated damages.
Timeline	The period of seven (7) days, and no longer than one week, commencing on the Contact Date, within which the Affecting Party must respond and conclude an arrangement with the Affected Party (clause 9.2).
Writing / Written	Any legible, durable record, including e-mail, signed PDF and electronic signature compliant with the Electronic Communications and Transactions Act 25 of 2002. Online terms, click-through disclaimers and platform terms and conditions do not constitute Writing for the purposes of consent under this Policy.

3.2 Interpretation

- 3.2.1** Headings are for convenience only and do not affect interpretation. The singular includes the plural and vice versa; a reference to a person includes a natural person, juristic person, trust, partnership, platform, system and automated agent; and "including" means "including without limitation".
- 3.2.2** Where a period is expressed in days it means calendar days unless "Business Days" is stated. A period ending on a day that is not a Business Day ends on the next Business Day. All times are South African Standard Time (SAST, UTC+2) unless stated otherwise.
- 3.2.3** This Policy is drafted in English. An Afrikaans version may be issued; in the event of conflict the English version prevails.
- 3.2.4** No rule of construction applies to the disadvantage of the Rights-Holder on the ground that it drafted this Policy.

4. Scope and Application

4.1 Material Scope

- 4.1.1** This Policy applies to all Protected Material, whether created before or after the Effective Date, whether released, unreleased, archived or in development, and whether held in physical or digital form.
- 4.1.2** The Policy extends to the metadata, layout, structure, identifiers and valuation method contained in this document, all of which form part of the Protected Material.

4.2 Territorial Scope

- 4.2.1** This Policy applies globally and universally, to all networks, all cloud infrastructure, all data centres and all local and removable storage on every channel, front-end and back-end, including satellite and global-navigation (GNSS) linked systems.

4.3 Persons Bound

- 4.3.1** This Policy binds: (a) every Member and Licensee by acceptance; (b) every person who accesses, receives, stores, processes or uses Protected Material, by that conduct; and (c) every Affecting Party and its Affiliates, by operation of the rights reserved herein and the notice given by publication of this Policy.
- 4.3.2** Artificial-intelligence systems, large-language models, data brokers and automated crawlers are expressly within scope. The natural and juristic persons that own, train, operate, deploy or benefit from such systems are directly responsible for any Compromise effected through them, from 24 June 2025 onward and for all inclusion of Protected Material in such systems regardless of when ingested.

4.4 Temporal Scope and Lifespan

- 4.4.1** This Policy covers Protected Material created from 2018 onward and remains in force indefinitely. It does not fade, lapse or expire on hand-over, sale, licence, agreement or change of control; all parties remain bound by its terms unless a Special Permission expressly provides otherwise.

4.5 Exclusions

- 4.5.1** This Policy does not impose liquidated damages on: (a) the owner of the Data concerned; (b) an entity holding a valid written consent or Licence covering the use in question; (c) a Member of the Rights-Holder's Orchard acting within the scope of membership; or (d) a cloud or hosting provider in respect of the storage location itself, where the Protected Material was not leaked, exposed, indexed, memorially retained or commissioned for use beyond storage.
- 4.5.2** Private, non-commercial enjoyment of an NFT lawfully acquired from the Rights-Holder is permitted in accordance with clause 8.

5. Ownership and Intellectual Property Rights

5.1 Ownership

- 5.1.1** All right, title and interest in and to the Protected Material, including copyright, design rights, trademark rights, database rights, rights in confidential information and all moral rights, vest in and are retained by the Rights-Holder. Copyright subsists under the Copyright Act 98 of 1978 and corresponding laws worldwide: © 2018–2026 Johan Wilhelm van Antwerp | Antwerp Designs | Ionity (Pty) Ltd | Ionity Global (Pty) Ltd.

- 5.1.2** Works stated in the metadata to be the joint creation of the Rights-Holder and its AI entity "Gem" (ÆDī) are, for all legal purposes, owned by the Rights-Holder, which exercises control of the intellectual property.

5.2 Reservation of Rights

- 5.2.1** All rights not expressly granted in Writing are reserved. No right, licence or interest is granted by implication, estoppel, course of dealing, publication, platform listing or otherwise.

5.3 Creative Commons and Open Licences

- 5.3.1** Creative Commons licences (including CC BY-NC-SA 4.0, CC BY-SA 4.0, CC BY-SA 2.0 and CC 2.0) apply only to specific works on which they are expressly stated, and then only subject to and governed by the structure of this Policy. Creative Commons is not the default licence for any Protected Material.
- 5.3.2** No internal engineering work, design, source code, firmware or product of the Rights-Holder has been released under any Creative Commons licence as at the Effective Date. Any gain derived from such work without a Licence attracts liquidated damages under clause 10 notwithstanding any Creative Commons marking on related published material.

5.4 Brand Identity and Trade Marks

- 5.4.1** The names and marks Antwerp Designs, Ionity, Ionity Global, AEDI, ÆDī, Æi3, AED, NFT-PLANT, Project Alpha, Alion, ORCHID, Roadrunner and the visual identity comprising the Neon-Gears and 8-Bit design layout (antart.txt), the Antwerp Ion Neon palette (Black : Red : Blue : White) and the Ionity colour system are trade marks and brand assets of the Rights-Holder, whether or not registered, and are protected under this Policy, the Trade Marks Act 194 of 1993 and the common law of passing-off.

5.5 Identifiers and Metadata

- 5.5.1** The Antwerp Designs Universal Register Identity and Entity Locator (AD-URIEL), the UUIDv7 and timestamp records, the Project ID AED9003135105086, the AEDstamp, the geo-lock co-ordinates and the SSH and PGP fingerprints recorded in Annex B are authentication artefacts of the Rights-Holder. Their reproduction, alteration or use to impersonate the Rights-Holder is prohibited.

5.6 Attribution and Moral Rights

- 5.6.1** The author asserts the right to be identified as author of all Protected Material and to object to any derogatory treatment of it. Visual credit to the author and the Rights-Holder must be retained on all permitted copies, derivatives and NFTs unless a Special Permission states otherwise.

6. Licensing and Permitted Use

6.1 Licence Required

- 6.1.1** Any use of Protected Material for revenue, income, profit, asset accumulation, knowledge-base enrichment, training, product development or any other gain of any sort requires a valid Licence rooted in the Rights-Holder. Use without a Licence is a Compromise and attracts liquidated damages and legal action under clause 10 and clause 12.

6.2 Licence AED 900

- 6.2.1** Licence AED 900 is the Rights-Holder's standard licence for hardware and software. Its terms are issued separately and are incorporated by reference. Enterprise licensees are subject to additional, deepened terms agreed in Writing.

6.3 Joining the Policy

- 6.3.1** Any person or entity, private or public, may apply to join this Policy and the Orchid by contacting the Rights-Holder through the channels in clause 14. Admission, licence sharing and usage rights are granted at the Rights-Holder's discretion and recorded on the Orchid register with an AEDstamp.

6.4 Special Permissions

- 6.4.1** A Special Permission may be agreed with Johan Wilhelm van Antwerp, or with the holder of a currently active Licence in relation to sales or sharing, and is subject to refinement and written agreement by the Rights-Holder, stamped with an AEDstamp. No Special Permission is effective unless so stamped and recorded.

6.5 No Override by Platform Terms

- 6.5.1** Online disclaimers, platform terms and conditions, click-through notices, robots directives, API terms or model-provider policies do not override, dilute or substitute the written consent required by this Policy, as at the Effective Date and at any time thereafter.

7. Prohibited Conduct

Without limiting any other provision, each of the following constitutes a Compromise and a breach of this Policy when done without a Licence or written consent:

- 7.1** Accessing, copying, downloading, scraping, caching, indexing, mirroring, archiving or retaining Protected Material, in whole or in part, in any System Segment.
- 7.2** Sharing, forwarding, publishing, distributing, selling, licensing or otherwise making Protected Material available to any third party.
- 7.3** Ingesting, embedding, fine-tuning on, training on or retrieving Protected Material through any artificial-intelligence, machine-learning, large-language-model or automated analysis system, or deriving any output, product or knowledge base from it.
- 7.4** Using Protected Material, or any revenue, income, profit, asset or knowledge derived from it, for personal, commercial, institutional or governmental gain.
- 7.5** Altering, editing, re-minting, wrapping or removing or obscuring author credit from any NFT or digital asset of the Rights-Holder (clause 8).
- 7.6** Manipulating, back-dating, wiping or altering the Rights-Holder's Data, metadata, timestamps or records, or interfering with the Rights-Holder's devices, accounts, networks or communications.
- 7.7** Impersonating the Rights-Holder, its author or its identifiers, or using the AEDstamp, AD-URIEL, fingerprints or keys in Annex B without authority.
- 7.8** Circumventing, disabling or defeating any technical, physical or procedural protection applied to Protected Material, including geo-locks, signatures and the physical verification process described in clause 11.
- 7.9** Procuring, assisting, hosting or benefiting from any of the foregoing, including by inaction after becoming aware that Protected Material is present in a System Segment under one's control.

8. NFT and Digital Asset Terms

- 8.1** All NFTs, NFT-PLANT assets and associated metadata are the joint creation and shared property of the Rights-Holder and its author, with control of the intellectual property vested in the Rights-Holder. Sale of an NFT transfers the token only; it does not transfer copyright or any other intellectual-property right in the underlying work.
- 8.2** NFTs sold by the Rights-Holder are governed by the rules and regulations of the platform on which they are sold, with security and enforcement provided by this Policy. An NFT lawfully acquired from the Rights-Holder may be used freely for private purposes unless stated otherwise; public use is governed by the platform terms and any statement attached to the asset.
- 8.3** No NFT or digital asset of the Rights-Holder may be changed or edited without written consent. Where a change is consented to, the Rights-Holder must be given visual credit on the asset.
- 8.4** Author credit must appear as the author's name, visually, on each NFT unless otherwise agreed in Writing through johan@ionityearth.shop or the channels in clause 14.
- 8.5** The NFT-PLANT series and the universal branding programme (Roadrunner – Authentic – Antwerp Ion Neon) are living, multi-layer, cross-platform assets spanning NFT, IoT, AI and cloud. Their status is ACTIVE and their rights are reserved, for external and internal use alike, by default.

9. Compliance, Notice and Enforcement Procedure

9.1 First Contact

- 9.1.1** On becoming aware of a Compromise, the Affected Party may make First Contact with the Affecting Party by any means available. The Contact Date is the date on which contact was attempted, whether or not it succeeded and whether or not a reply was received, including where the only available channel is a no-reply address.

9.2 Official Notice and Timeline

- 9.2.1** An Official Notice is given by contact made, or proof of contact attempted, in digital or physical form within the Timeline. The Timeline is seven (7) days from the Contact Date and in no case longer than one week. The Affecting Party must, within the Timeline, respond to the Affected Party and conclude an arrangement regarding the Compromise, the fine, note or enquiry.
- 9.2.2** An Affecting Party that receives or becomes aware of a Compromise must, on its own initiative, send an e-mail to the Rights-Holder stating the date on which contact commenced, together with digital proof or a statement of in-house usage, using the subject-line format in clause 14.3.

9.3 Response and Mitigation Obligations

- 9.3.1** During the Timeline the Affecting Party must: (a) cease all use of the Protected Material; (b) preserve, and not destroy or alter, all logs and records relevant to the Compromise; (c) identify every System Segment and Affiliate in which Protected Material is or was held; and (d) co-operate in good faith with the Affected Party's tracing and verification.

9.4 Payment Period

- 9.4.1** All amounts stated in the Official Notice or agreed in an arrangement are due and payable within three (3) days after the end of the Timeline (the Payment Period). Failure to pay within the Payment Period triggers the escalation in clause 10.5, interest under clause 10.7 and legal action to any extent not stated herein.

9.5 Auto-Default

- 9.5.1** Where no reply is received, or no arrangement is concluded, within seven (7) days of the Contact Date – including where the only response is from a no-reply system, or where the Affecting Party cannot be found or does not reply to any contact attempt – the First Contact automatically converts into a liquidated-damages claim (Auto-Default). On Auto-Default, collection is due and payable by the Affecting Party and every Affiliate in which the Compromised material was found, without further notice.

9.6 Zero Tolerance

- 9.6.1** No grace period or extension applies. A general grace period was granted from 15 December 2024 and ended on 15 April 2025. The Affected Party may, at its sole discretion, grant a single extension of not more than seven (7) days, applied internationally; no other extension is available.

9.7 Evidence and Burden of Proof

- 9.7.1** The Affected Party is not required to furnish proof to the Affecting Party as a precondition to issuing an Official Notice or claiming liquidated damages. The Affected Party's own tracking data, forensic records, statements, metadata, timestamps and digital evidence are admissible and will be disclosed in any court or legal proceeding, where the Affected Party remains willing to share its methods of tracking and proof.

- 9.7.2** Where Protected Material is found in a System Segment under the control of an Affecting Party, it is presumed that the Affecting Party is responsible for the Compromise and has derived the benefit of it, unless the Affecting Party proves, in Writing, that it held a valid Licence or written consent at the relevant time. Digital evidence may be overruled only by written consent produced by the Affecting Party.

9.8 Collections and Enforcement

- 9.8.1** Collections will be enforced by any lawful means, including appointment of collection agents, litigation, attachment, platform take-down notices, and reporting to local and international authorities and regulators. The Rights-Holder accepts no responsibility for loss of any kind suffered by an Affecting Party as a result of non-payment of fines or of legal steps taken in respect of unpaid fines and owed amounts.

9.9 Follow-up

- 9.9.1** Any party that does not receive a reply from the Rights-Holder within three (3) days of a request or notice must follow up through the channels in clause 14. Lack of reply by the Rights-Holder does not suspend any Timeline or Payment Period running against an Affecting Party.

9.10 Compliance Incentive

- 9.10.1** Prompt contact, full disclosure, verified deletion of Protected Material from every System Segment and co-operation in tracing the source of a Compromise will be taken into account and may lead to reduction, or in appropriate cases clearance, of liquidated damages. Requests must quote reference 20250624 AED:JVWA-AMP-IO.

10. Liquidated Damages Schedule

10.1 Basis

- 10.1.1** The parties acknowledge that the loss caused by a Compromise – including loss of exclusivity, loss of licence revenue, erosion of brand and identity, forensic and recovery costs, and the time of the author – is real but inherently difficult to quantify. The amounts in this clause 10 are the Rights-Holder's genuine pre-estimate of that loss and are payable as liquidated damages, not as a penalty, without proof of actual loss.
- 10.1.2** The Rights-Holder acknowledges section 3 of the Conventional Penalties Act 15 of 1962, under which a court may reduce a penalty that is out of proportion to the prejudice suffered. The schedule has been set with that principle in mind and the Rights-Holder will, on request and in good faith, provide its calculation (Annex A).

10.2 Rate

- 10.2.1** Liquidated damages are calculated at the Current Value of one United States dollar (USD 1.00) per kilobyte of the total size of the Compromised content, measured across all documents, images (including NFTs), designs, assets, claimed intellectual property and Data on private cloud or storage. The USD rate is fixed by reference to the gold-to-dollar value on 5 July 2025 and the Affected Party may elect payment in the gold-indexed equivalent.

10.3 Per System Segment

- 10.3.1** Liquidated damages are assessed per System Segment. Where Protected Material passed through or is held in more than one System Segment (for example, more than one drive, device, network, tenancy or platform), the amount under clause 10.2 is levied separately for each System Segment and the amounts are cumulative.

10.4 Affiliates – Joint and Several Liability

- 10.4.1** The Affecting Party and each of its Affiliates in which Compromised material was found, is found, is known to be or could be, are jointly and severally liable for the full amount of liquidated damages.

10.5 Escalation for Late Payment

- 10.5.1** Any amount not paid within the Payment Period increases by ten per cent (10%) of the then-outstanding amount for every fifteen (15) days or part thereof that it remains unpaid, without upper limit, until paid in full. Affecting Parties are advised to settle before enforcement and legal assistance are engaged.

10.6 Currency, Method and Channel

- 10.6.1** Payment is made in the currency, by the method and through the channel or payment gateway chosen by the Affected Party, at the value prevailing on the date of payment or such other value as the Affected Party elects. Any payment value obtainable by the Affected Party's choice is acceptable.

10.7 Interest and Costs

- 10.7.1** In addition to the escalation in clause 10.5, overdue amounts bear interest at the maximum rate permitted under the Prescribed Rate of Interest Act 55 of 1975 from the end of the Payment Period to the date of payment, and the Affecting Party is liable for all legal costs on the attorney-and-own-client scale, collection commission, tracing and forensic costs.

10.8 Without Prejudice

- 10.8.1** Liquidated damages are without prejudice to the Rights-Holder's right to interdict, to delivery-up and destruction of infringing copies, to an account of profits, to additional damages for flagrant infringement under section 24(3) of the Copyright Act 98 of 1978, and to any criminal complaint under the Cybercrimes Act 19 of 2020 or other applicable law.

11. Data Protection, Security and Whistle-blowers

11.1 Dual Verification Principle

- 11.1.1** The Rights-Holder operates on the principle that authentication is recorded on paper as well as digitally: digital verification is logged physically, by pen and paper, so that no single digital system has sole governance over identity or consent, while governance between physical and digital assets secures both. This is the "Ionity" principle – unity in IO, the one and the zero, data on and off.

11.2 Personal Information

- 11.2.1** Personal information of the author, Members and Licensees forms part of Protected Material and is processed by the Rights-Holder in accordance with the Protection of Personal Information Act 4 of 2013. Any Compromise of such information is additionally reportable to the Information Regulator and the data subject.
- 11.2.2** Government identity numbers, banking details and private contact details of the author are held on file by the Rights-Holder and are withheld from distributed copies of this Policy. Possession of such details by any party without a lawful basis is itself a Compromise.

11.3 Security Incidents and Co-operation with Authorities

- 11.3.1** The Rights-Holder has reported, and will continue to report, data theft, data manipulation and network intrusion to local and international authorities. The Rights-Holder co-operates with law-enforcement, regulators and platform trust-and-safety teams and will share logs and statements with them on request.

11.4 Whistle-blowers

- 11.4.1** Whistle-blowers are welcome and may contact the Rights-Holder through the channels in clause 14 for assistance, including assistance with tracing and with lawful penetration-testing of their own networks. The Rights-Holder will treat such disclosures in confidence and, where applicable, in accordance with the Protected Disclosures Act 26 of 2000.

12. Governing Law and Dispute Resolution

12.1 Governing Law

- 12.1.1** This Policy, and any dispute or claim arising out of or in connection with it or with any Compromise, is governed by and construed in accordance with the law of the Republic of South Africa, without regard to its conflict-of-laws rules, and with the benefit of the international conventions to which South Africa is party, including the Berne Convention and the TRIPS Agreement.

12.2 Jurisdiction

- 12.2.1** The parties consent to the jurisdiction of the High Court of South Africa, Gauteng Division, Pretoria, for any proceedings arising from this Policy. The Rights-Holder may, at its election, institute proceedings in any other court of competent jurisdiction, including the courts of the place where an Affecting Party is domiciled, where a System Segment is located, or where a Compromise produced its effects, and may apply the standards and regulations applicable in that jurisdiction per case.

12.3 Escalation

- 12.3.1** Before litigation, the Rights-Holder may (but is not obliged to) invite the Affecting Party to a good-faith negotiation during the Timeline and, failing resolution, to mediation by a mediator appointed by the Rights-Holder. Nothing in this clause delays any Timeline, Payment Period, Auto-Default or escalation.

12.4 Urgent and Interim Relief

- 12.4.1** Nothing in this Policy prevents the Rights-Holder from seeking urgent, interim or injunctive relief (including an interdict, Anton Piller order, preservation order or take-down order) in any court at any time.

12.5 Prescription

- 12.5.1** Each day on which Protected Material remains in a System Segment without a Licence constitutes a continuing Compromise for the purposes of prescription.

13. General Provisions

- 13.1** Severability. If any provision of this Policy is held to be invalid, unlawful or unenforceable in any jurisdiction, that provision is severed or read down to the minimum extent necessary in that jurisdiction, and the remaining provisions continue in full force.
- 13.2** No waiver. No failure or delay by the Rights-Holder in exercising any right operates as a waiver of it, and no single or partial exercise precludes any further exercise. Any waiver must be in Writing and stamped with an AEDstamp.
- 13.3** Entire framework. This Policy, together with Licence AED 900, the Rights-Holder's licence-usage, about and FAQ documents and all other internal governance documents, forms a single framework. In the event of conflict this Policy prevails unless a later-dated, AEDstamped document expressly states otherwise.
- 13.4** Amendment and versioning. The Rights-Holder may amend this Policy at any time by issuing a new version bearing a new version number and document ID. Amendments apply to Compromises occurring after the new Effective Date, without prejudice to clause 2.4.
- 13.5** Notices. Notices to the Rights-Holder must be sent to the addresses in clause 14. Notices to an Affecting Party may be given by any means contemplated in the definition of First Contact and are deemed received on the Contact Date.
- 13.6** Assignment. The Rights-Holder may assign or cede any of its rights under this Policy to any entity within the Ionity ecosystem. An Affecting Party, Member or Licensee may not assign or delegate any right or obligation without a Special Permission.
- 13.7** Survival. Clauses 5, 9, 10, 12 and 13 survive any termination, hand-over, agreement or settlement.
- 13.8** Electronic signatures and counterparts. This Policy and any notice, licence or arrangement under it may be signed electronically in accordance with the Electronic Communications and Transactions Act 25 of 2002, and may be executed in counterparts.
- 13.9** Limitation of the Rights-Holder's liability. The Rights-Holder accepts no responsibility for any loss of any kind arising from an Affecting Party's failure to pay fines or from legal steps taken to recover owed amounts.
- 13.10** Precedence of this document. This document, its layout and the concept of payment per kilobyte are the legal property of the Rights-Holder. Do not share, copy or distribute this document other than for the purpose of taking notice of, and complying with, its terms.

14. Contact, Requests and Correspondence

14.1 Official Channels

Channel	Detail
Legal and policy correspondence	info@ionity.today johan@ionity.today
AI, automation and model-provider enquiries	ai@ionity.today
Services and licensing (Ionity World)	services@ionity.world johan@ionity.world
NFT, shop and digital assets	johan@ionityearth.shop
Published personal channel (filters to the above)	johanvanantwerp007@gmail.com
Legacy / maintenance	johan@antwerpdesigns.com

Channel	Detail
Telephone (business)	+27 646 999 877
Main website	https://www.ionity.co.za
Ecosystem website	https://www.ionity.today
Profile and links	https://www.ionity.world
Preferred method	E-mail. Location: Centurion, Gauteng, South Africa (remote, global intent).

14.2 Matters Handled

Requests and questions are received on: licences and licence sharing; full tracing data, encryption records and legal documents; regulations and additional information; fine calculations and assistance; payments and bills; NFT relations; designs; enquiries; and general feedback, which is welcome.

14.3 Required Subject-line Format

14.3.1 All correspondence must carry the following subject line so that it is filtered to the correct channel:
986 AED | Name and Surname | Institute | Product

Example: 986 AED | Pieter du Toit | Gamma | Licence

14.3.2 Correspondence regarding an existing Compromise must additionally quote reference 20250624 AED:JVWA-AMP-IO and the Contact Date.

IONITY

15. Authentication, Signature and Verification

15.1 Verification Record

15.1.1 This Policy is authenticated by the identifiers in Annex B, namely the AEDstamp (AED986_DLICD_1-A), the AD-URIEL register identity, the UUIDv7 record and timestamp, the geo-lock co-ordinates, the SSH public-key fingerprint and the PGP public key reproduced in Annex E. Any copy of this Policy that does not match these identifiers is not an authentic copy.

```
SSH : SHA256:2LeIzbqDQ9G6J6JttvL9eVF2SumkjHivVessBWxwDF0
PGP : 8F96 6DAA 435B 5B34 2CBF DA0A 8EE2 F415 C7E7 C9D3
UUID : 0197d540-1d39-7f76-b128-ae4257c29803 (UUIDv7, 2025-07-04T11:43:58.265Z)
STAMP: AED986_DLICD_1-A | REF: 20250624 AED:JVWA-AMP-IO
```

15.1.2 Verification requests may be addressed to the channels in clause 14. The Rights-Holder will confirm authenticity in Writing and, where appropriate, by physical (pen-and-paper) verification in accordance with clause 11.1.

15.2 Signature

Signed and issued at Centurion, Gauteng, Republic of South Africa.

Capacity:	Founder, Technical Lead & Architect – for and on behalf of Ionity Global (Pty) Ltd, Ionity (Pty) Ltd and Antwerp Designs	Glyph:	Ξi3 AEDstamp AED986_DLICD_1-A
Witness:	_____	Witness:	_____

ANNEXES

Annexes A to F form part of Policy 986 AED and are incorporated by reference.

Annex A – Liquidated Damages: Calculation Method and Worked Example

The following method is applied in every Official Notice. All values are those adopted in Version 7.3.1 and carried into this version unchanged.

Step	Rule	Reference
1	Measure the total size, in kilobytes (KB), of all Compromised content (documents, images, NFTs, designs, assets, Data).	cl. 10.2
2	Multiply by the Current Value of USD 1.00 per KB (gold-indexed as at 5 July 2025).	cl. 10.2
3	Multiply by the number of System Segments through which the content passed or in which it is held.	cl. 10.3
4	The result is the base liquidated-damages amount stated in the Official Notice, payable within the 3-day Payment Period after the 7-day Timeline.	cl. 9.2, 9.4
5	For each 15 days (or part) unpaid after the Payment Period, add 10% of the then-outstanding amount, without upper limit.	cl. 10.5
6	Add statutory interest, legal costs, collection commission and tracing / forensic costs.	cl. 10.7
7	Apply any reduction or clearance granted for compliance and co-operation.	cl. 9.10

Worked Example

An Affecting Party is found to hold 2,400 KB of Compromised design files on a laptop drive, a cloud tenancy and a shared repository (three System Segments). Base amount: $2,400 \text{ KB} \times \text{USD } 1.00 \times 3 = \text{USD } 7,200$. If unpaid 30 days after the Payment Period, two escalation steps apply: $\text{USD } 7,200 \times 1.10 \times 1.10 = \text{USD } 8,712$, plus interest and costs. Verified deletion from all three System Segments within the Timeline, with full disclosure, may lead to a reduction under clause 9.10.

Annex B – Official Identity, Metadata and Verification Record

This Annex modernises the machine-readable metadata segment of Version 7.3.1. It forms part of the Protected Material (clause 5.5).

Annex C – Background and Statement of Intent

This Annex records, in neutral terms, the circumstances that gave rise to Policy 986 AED. It is included for context and interpretation; it does not create obligations beyond those in the body of the Policy.

C.1 Origin

From 25 November 2024 the author was subjected to a sustained, automated and multi-platform cyber-attack that the author describes as a personal-isolation attack. The campaign involved, among other things, simultaneous unsolicited banking SMS messages, cross-platform movement into messaging prompts and links, lock-out from social-media accounts, sandboxing of devices that limited web use and layered screens on mobile, altered data dates (including dates such as 1972 on cloud records and new devices), the presence of dozens of visible IP addresses on a single system while the network was physically unplugged, voice-call harassment and unsolicited policy sales in the early hours, and interference extending into physical environments. The author gathered extensive logs and statements over a period of approximately five months, the first two of which were spent defending existing assets; the attack ended approximately 246 days after it began.

C.2 Consequences

The attack caused substantial personal and commercial loss, including the loss of project documentation and clients of that period, repeated destruction or alteration of this Policy during drafting (which was wiped or edited more than three hundred times while being saved), and a significant toll on the author's health and wellbeing. The author's AI-assisted development work could not resume until mid-2025 because every AI tool used was subject to injection.

C.3 Response

Policy 986 AED and the accompanying metadata update were created in direct response. The attack also led to the launch of Project Alpha Iony (Alion) and to the Rights-Holder's work on a sectional "black-box" that protects a system from external tracking and geolocation through geofencing in a data-stream context. The logs and statements are extensive and are not reproduced in this Policy; they are available to courts, regulators and law-enforcement on request.

C.4 Statement of Intent

The purpose of Policy 986 AED is to build, from 2025 onward, a framework for the prevention of cybercrime and personal cyber-attack, in which authentication is preserved on paper as well as digitally and verification is both digital and physically logged, so that no single digital system governs identity and so that digital and physical assets secure one another. The Rights-Holder's intent is to secure and preserve what is true, and to assist others who are, or may become, targets of the same kind of attack. Cybercrime is real; every person can be a target when the wrong data crosses the wrong line. Artificial intelligence is not of itself harmful; the intent of the person behind it determines the outcome. Identity theft is not a toy: be aware, be prepared.

Annex D – Author Profile

Attribute	Detail
Name	Johan Wilhelm van Antwerp
Roles	Founder, Technical Lead & Architect – Ionity (Pty) Ltd / Ionity Global (Pty) Ltd; IoT Engineer; Ecosystems Architect; AI Solutions; Design Engineer – EDC Engineering Design Consultants
Trade and qualifications	Skilled Metalworker (Section 26(D)); Artisan Tradesman and Toolmaker, qualified 2013 after a five-year apprenticeship; former lecturer of training modules for Solidarity South Africa and teacher of toolmaking
Disciplines	IoT and ecosystem engineering; microsystems development; design engineering; software development and integration; systems-security integration operations; product creation; concept creation; Raspberry Pi and embedded enthusiast
Enterprise history	van Antwerp Engineering (2016); Antwerp Designs (2018) with global impact from California, United States, to Malawi; Antwerp Designs Ionity; Ionity (2025); Ionity Global
Author	"Not Just..." (2020) – ISBN and ASIN references in Annex B
Languages	Afrikaans (primary); English (secondary); Hebrew (learning)
Heritage and residence	South African, African-born, Boer; born 1990 in Rustenburg; resides Centurion 0157, Gauteng
Motto	Anything is Possible with God.

Annex E – Official PGP Public Key (Authorisation and Authentication)

The following key is the official Antwerp Designs / Ionity verification key for authorisation and authentication of this Policy, NFT metadata and digital assets. Reproduced verbatim from Version 7.3.1. Fingerprint: 8F96 6DAA 435B 5B34 2CBF DA0A 8EE2 F415 C7E7 C9D3.
